

LAMP WITH LED INSERT

INFORMATION ON THE MATERIAL

MATERIAL

Our lights are made of powder-coated aluminum and an LED insert of plastic (PE).

PROPERTIES

Aluminum is perfectly suited for the outdoors and is easy-care, heat-resistant, rustproof and recyclable.

The LED insert is treated with an ultra-highly effective protective treatment and is thus suitable for outdoor use. The LED insert has three color temperatures: cold white, warm white and neutral white.

The LED insert can be fully charged in about 5 hours, and provides approximately 8 hours of light.

It has been tested under standards IP54 (impermeability), CE, FCC and RoHs.

CARE AND STORAGE

For small stains on the aluminum frame, just clean with a soft cloth or sponge and tepid water. You can use neutral detergents (pH value ~7) to remove more stubborn dirt.

You should never use:

- scratching or abrasive materials
- cleansers containing solvents
- strongly acidic or alkaline solvents
- steel wool
- gasoline or thinners

You should also avoid dry cleaning, because that could scratch the surface. Due to the smooth surface, grease and oil adhere very well to the aluminum. We recommend cleaning the frame 2 x per year with our STERN Aluminum detergent & protector. It cleans and removes dirt, spots and corrosive residues.

To prevent spots developing, never clean aluminum in direct sunlight. The surface temperature should be a maximum of 25 °C when cleaning.

Contamination of the LED insert can be removed with a soft cloth or sponge and lukewarm water.

INSTRUCTIONS FOR USE

Short click:

1 click: ON / cold white (6.000 K)

2 clicks: warm white (4.000 K)

3 clicks: neutral white (4.500 K)

To switch off the light, press the ON button for 2 seconds. A red light is visible in the LED insert while the LED light is charging.

PRECAUTIONARY MEASURES

Please follow these recommendations to ensure proper functionality of the light:

- Only use the 1.5 m long USB charging cable included.
- Charge the battery regularly. This will extend the life of your battery. Please charge regularly in the winter months when the light is not in use.
- Only charge the LED insert indoors.
- Remove the charging cable as soon as the battery is fully charged.
- For safety reasons, never repair the device yourself.

The legal warranty is voided if you perform repairs yourself.

TECHNICAL INFORMATION

- LED insert 10 x 15 cm Li battery 1.000 mAh
- LED insert 16 x 24 cm Li battery 2.000 mAh
- Power consumption 0.6 watts
- Power supply DC5V1A
- Recommended operating temperature: 0 – 40 °C
- Outdoor protection of the LED: IP 54

CONFORMITY WITH REGULATIONS

The light source in the LED insert cannot be replaced. If it no longer functions, the entire LED insert must be replaced.

According to the regulations of WEEE directive 2012/19/EU, you are obligated to take this product to a collection point for recycling at the end of its life cycle. You can find a collection point near you here www.lightcycle.de.

STERN declares that this product meets European specifications. You can find the declaration of conformity via the STERN contact form at: www.stern-moebel.de.

- + PE-Material
- + Brightness: 3 levels of white (cold, warm, neutral)
- + Technology: LED 0,6 W
- + Charging: USB-cable 1,5 meter inclusive
- + Time of charging: 5 hours
- + Lighting duration: 8 hours
- + Li Battery: 1000 mAh
- + Density IP45
(dust protected, splash water protected)
- + CE certified
